

# ABAP Factory: Strengthening the core to your SAP Success

# WHY FOCUS ON SAP ABAP

---

*66.67% IT Decision Makers recognize the skill gap that exists in the SAP Marketplace. This gap is the biggest hindrance in meeting organizational objectives and goals.*

*We don't just meet the demand for short-term SAP ABAP Projects. We provide you with the best-in-class SAP ABAP Consultants to provide your endeavours with the most enhanced skill set.*

---

**There's a need for speed in ABAP:** 28% SAP jobs are open for as long or more than the time it takes to complete them. Orane's ABAPers fast track your ABAP Development by implementing industry best-practices.

Taking large amounts of time on a single project can drain a company's resources and decrease or altogether eliminate the ROI an organization can achieve on its SAP Investment.

**We offer improvements that cannot be offered by average IT Departments:**

Extensive experience in **Manufacturing, Foods & Beverages, Public Sector, Utilities, CPG, Distribution, Retail, Cement, and Automotive, Airlines** allows us to take RICEF Improvements to the next level. Enhanced skill-set of our consultants includes ABAP S/4 HANA, UI 5 Development, FIORI, HYBRIS, Predictive Analysis, Workflow and Integrations.

Average IT Departments, although competent, often lack the experience, frameworks, methods and know-how to implement business processes comprehensively. Technical skills are not enough anymore to get the best out of your ERP.

**Cost is not everything, but we provide you Tier 1 standard resources at competitive prices:** Our recruitment standards are in accordance with CMMI Level 5. This ensures that our consultants are equipped with advanced skills and other essential attributes like communication skills and decision-making capabilities.

The SAP Gig-Economy still reports price as one of the top-3 most important factors when an organization outsources work to a vendor.
