

# Dev Factory for SAP

An Orane success story on DevFactory for  
a global SAP Partner

## Quick Facts

**Location:** UK & I, Singapore

**Industry:** Multiple Industries

**Product & Services:** Consulting, Services

**TimeZone:** UK, singapore

**Serviced from :** India

**Team Size:** 08

## Client Situation: Key Challenges

The UK based business partners were looking for a set of ABAP developers ranging with the skills in core ABAP, OOABAP, Smart forms, ALE/IDOC with hands-on expertise in MM/MM, PP, SD and FICO.

The partner had main challenges like

1. All SAP skills within one organization
2. All SAP functional exposure with same ABAP team under one roof
3. Unified delivery approach
4. Quality certifications
5. Competitive pricing and faster turn around time.

## Our Solutions

1. Orane proposed the approach of ABAP DevFactory
2. Multiple ABAP / Functional skills aligned to meet diversified customer requirements
3. Single Point of Contact for the partners to minimize communication threads
4. Approval process for estimation, design and developments
5. Clear definition of acceptance criteria
6. Wide spectrum of testing capabilities to ensure the quality of deliverables.

## Business Benefits Achieved

1. Single stop shop for all SAP development needs
2. Ease of resource management
3. Efficient and faster model to support multiple applications
4. Cost effective resourcing due to factory approach
5. Single communication thread for all developments

The best **simplifications** of complexities of a business are done by **SAP**, and the best simplification of managed services is done by **ORANE**
