

Digital Signatures

Do you have the Best Digital Signature Solution within your ERP?

SAP users store and process a wide range of sensitive and valuable information which has to be secured at all the levels of business along with Digital Signatures on documents such as Purchase Orders, Sales Invoices, Credit and Debit Notes, Form 16, etc.

A Digital Signature Solution within SAP?

EasySign is a *Digital Signature Solution within SAP* to sign documents digitally. The signature of signing authorities, real-time time stamp of signing, company name, etc. is also embedded in the document. These Digital Signature Certificates are legal and accepted worldwide by the organizations and government to authenticate the document. All signatures are unique, encrypted and tamper resistant

Secure and Integrate Your Identity with EasySign

With the help of **EasySign** all the signing operations are performed within SAP automatically. It makes it more secure as there is no manual interference.

- As soon as the document is generated the solution will put the signature with a time stamp.
- A digital document is very quickly signed with the one-click signing option.
- The signing authority can preview the document, examine the data and then sign the document or save the document for later use.
- This digital signature tool removes the complexity and time consumption of document transfer between clients, vendors, and departments.

With **EasySign**, you get the highest level of **Security, Legal Compliance, Integrity, and Automated Authentication.**
