

Best Practices for SAP S/4HANA Integration

Digital transformation or innovation has become the topic of debate in each boardroom and LOB agenda. However, several business leaders may understand that the complexness associated with digital innovation could also be a significant obstacle preventing them from realizing any true worth.

Firms would love a digital core to overcome complexness and drive digital transformation. SAP S/4 HANA is such a digital core that will facilitate companies to overcome complexness and thrive in today's troubled market. S/4 HANA helps you reinvent your business model by providing quick access to real-time information.

S/4 HANA implementation Methodology

Let's jump ahead and have a look at the 'new implementation' scenario with SAP S/4 HANA. SAP always recommends the SAP Activate procedure for S/4 HANA implementation. SAP Launch methodologies and combines three core pillars – SAP guided configuration, SAP Best Practices, and Methodology. SAP Activate Methodology offers each Cloud and on-premise solution. It is a standard and agile framework that accelerates migration or implementation to S/4 HANA. SAP Activate consolidates the data and accelerators to help you innovate quicker than before.

Throughout the project life cycle, SAP Activate follows 6 phases:

- **Discover,**
- **Prepare,**
- **Explore,**
- **Realize,**
- **Deploy,**
- **And Run.**

The SAP S/4 HANA Roadmap provides elaborated info on the implementation and specific methodologies. The Roadmap view of the Tool relies on Fiori applications and aims to guide you on your S/4 HANA journey by providing you project enhancement and alternative relevant info on the product implementation.

- Accelerate and simplify the adoption of SAP S/4HANA Cloud
- Accelerate and simplify the adoption of SAP S/4HANA Cloud for faster time to value, using best practice business processes with the knowledge of being legally compliant in numerous countries.
- Reduce the cost of operations by using standardized processes
- Manage multiple geographies, divisions, subsidiaries, and ledgers with global and country-specific content
- Drive operational efficiencies and adjust to regulations
- Empower business and IT users equally with guided configuration
- Allow a first-hand experience of SAP S/4HANA Cloud with instant guided trials
- Update and alter customer-specific configuration using SAP S/4HANA life-cycle management tools

SAP S/4HANA: Best Practices on the way to Migrate Strategies for Integration, Process Continuity, and Governance Challenges

SAP is a tremendous application that eventually transforms the way a company does business. it's highly configurable and certainly, supports many processes and their variations out of the box. However, it still cannot do everything. SAP integration with non-SAP systems is commonly needed for efficient business operations.

This is so because SAP forms the core of the enterprise and has data that other applications would wish to figure.

As enterprise organizations still transition more services to become accessible from the cloud for their customers and employees, the speed of integrating, governing, and orchestrating data between ERP and non-ERP applications is exponentially rising. However, there are some interesting nuances to the present Element compared to other Elements. SAP S/4HANA is the core ERP to several of the biggest organizations within the world, automating and centralizing all aspects of the business. due to this, the range of use cases and implementations of S/4HANA stretch across every vertical and kind of business you'll imagine, from cars to software to oils.

Given the extensive range and high level of customization with each implementation of S/4HANA, we had to make the ability for our customers to adopt the need of the integration with 3rd party applications potentially in many different scenarios. To accomplish this, SAP Experts created a general resource based on the BAPI (Business APIs) and ODATA framework of SAP that connects to the heart of the data flowing within an SAP S/4HANA Cloud environment.

Expertise can access the precise tables within S/4HANA. This approach gives the general access needed but allows for the entire customization to increase accessibility area in the S4HANA environment.

Why is that this important?

This permits customers that are using a hybrid application environment (SAP and non-SAP) to access and govern the data they care about throughout their entire ecosystem. From the frontline applications of CRM, Marketing Automation, and Human Capital Management all the thanks to their ERP of choice, during this case, SAP S/4HANA. This becomes tangible when orchestrating different operation scenarios like:

- Hire-to-Retire,
- Order-to-Cash,
- Lead-to-Customer,
- and Procure-to-Pay.

About ORANE:

Established in 2009, Orane Consulting Pvt. Ltd is an IT Consulting Company. We are a team of 160+ dedicated professionals who are committed to meet and exceed customer expectations. Our unique technology capabilities coupled with domain understanding has enabled us to provide excellent value-driven solutions to customers across verticals. We're authentic in our actions and approach, we have a passion for innovation, and we know that smart insights lead to better outcomes... making way for you to achieve unstoppable business intelligence. We partner with our customers to break down the barriers preventing insight-driven decision-making by transforming their data and analytics into a conduit for growth and innovation.
